## URBAN DESIGN

### FORNITURE FOR SMART URBANSCAPES

*Also this year CITYSi continues with renewed commitment to its design research on the "positive city".*

*Urban space is a complex organism that constantly evolves; the product of the interactions between man and the environment. Interactions not always easily decodable, not always aware, but that translate the city into a multiply of new urban horizons fascinating but not always on a human scale.*

*The urban space we have in mind, the "ordinary" space in which we move every day, is a space that we not only want to decode and understand, but it is also a space that surprise us, that becomes "extraordinary" each time.*

*A space that at any time we can recognize as our "urban landscape". The urban landscape, as we would like to interpret it, is made up of objects whose functionality, conveyed by a careful study of shapes and colors, also translates into a strong "smart" attitude.*

*In this scenario, we like to imagine our products, proudly Italian from the design to their realization, as artifacts to support an experience: the complete immersion of man in this wonderful complexity that the contemporary urban space offers us. A space that thus becomes the unique and extraordinary landscape of each of us.*

# CITYSì

ARREDO URBANO / URBAN DESIGN

Anche quest'anno CITYSì prosegue con rinnovato impegno nella sua ricerca progettuale sulla CITTÀ POSITIVA.

Lo spazio urbano è un organismo complesso che si evolve costantemente; il prodotto delle interazioni tra uomo e ambiente. Interazioni non sempre facilmente decodificabili, non sempre consapevoli, ma che traducono la città in un moltiplicarsi di nuovi orizzonti urbani affascinanti ma non sempre a misura d'uomo.

Lo spazio urbano a cui pensiamo, lo spazio "ordinario" in cui tutti i giorni ci muoviamo, è uno spazio che non solo vogliamo decodificare e comprendere ma è anche uno spazio che vogliamo ci sorprenda, che diventi ogni volta "straordinario".

Uno spazio che in ogni momento possiamo riconoscere come il nostro paesaggio urbano.

Il paesaggio urbano così come vorremmo interpretarlo è fatto da oggetti la cui funzionalità, veicolata da un attento studio delle forme e dei colori si traduce inoltre in una spiccata attitudine smart.

In questo scenario ci piace immaginare i nostri prodotti, orgogliosamente italiani, dalla progettazione fino alla loro realizzazione, come manufatti a supporto di un'esperienza la completa immersione dell'uomo in questa meravigliosa complessità che lo spazio urbano contemporaneo ci offre. Uno spazio che diventa così il paesaggio unico e straordinario di ciascuno di noi.

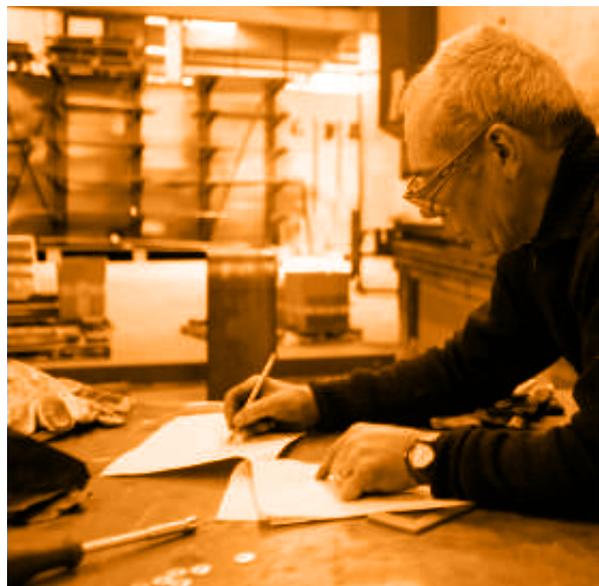

# Dove nascono le idee \*

Where ideas are made

Designers, studio tecnico e reparto produttivo uniti per la creazione e prototipizzazione dei prodotti CITYSi.

*Designers, technical department, and production department together for the creation and prototypes of Citysi's products.*

# Alluminio, ecologico e riciclabile\*

Aluminum eco recycled and recyclable

*The high durability of aluminum over time and the possibility to recycle it 100% without loss of quality meant that the 'green material' was defined. Its extraordinary strength is combined with the anti-corrosion properties and low maintenance required.*

#### THE RECYCLE:

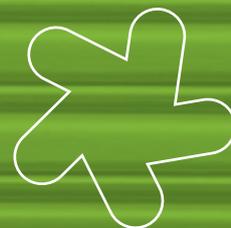

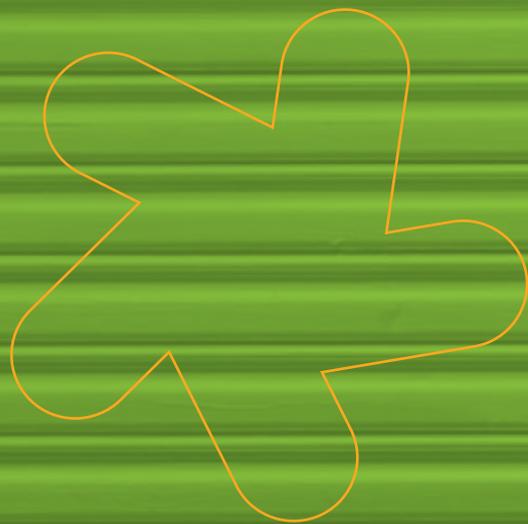

*Almost 75% of aluminum products made in the past are still used today; this is because aluminum can be reused for the same purpose over and over again. All this contributes to the creation of a basin of availability of the material in continuous reassortment. Unlike other materials, aluminum does not lose its characteristics and peculiarities during the recycling process.*

*In addition, recycling requires only 5% of the energy used originally for production, which saves 9 tonnes of CO2 emissions. The recycling of aluminum waste currently saves about 80 million tons of gas emitted every year into the atmosphere.*

*For this reason CITYSì, always paying attention to the support of ecology and combined with a strong experience in the processing of metal material, uses aluminum for its urban furniture products, reducing maintenance, costs and weights to a minimum.*

*Furthermore, with the wood effect on aluminum, CITYSì offers a valid alternative where wood is present in its products, allowing the reproduction of the grain through an industrial process.*

*CITYSì offers a wide range of products using Aluminum:*

**CITYSì**  
propone una vasta gamma di prodotti  
che utilizzano l'Alluminio

L'alta durata dell'alluminio nel tempo e la possibilità di riciclarlo al 100% senza perdita di qualità ha fatto sì che venisse definito il 'materiale verde'. La sua straordinaria forza, unita alle proprietà anti-corrosione e alle caratteristiche di bassa manutenzione richiesta.

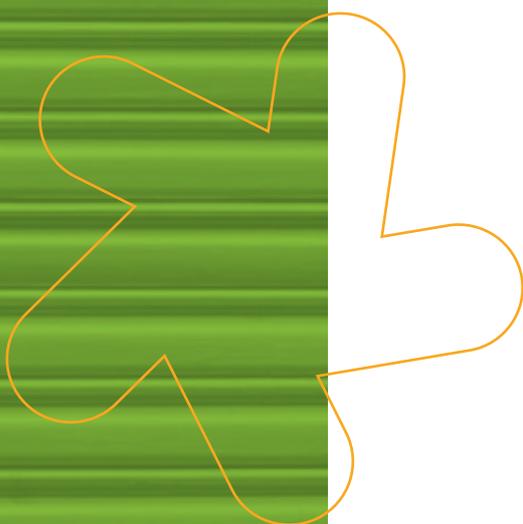

### **IL RICICLO:**

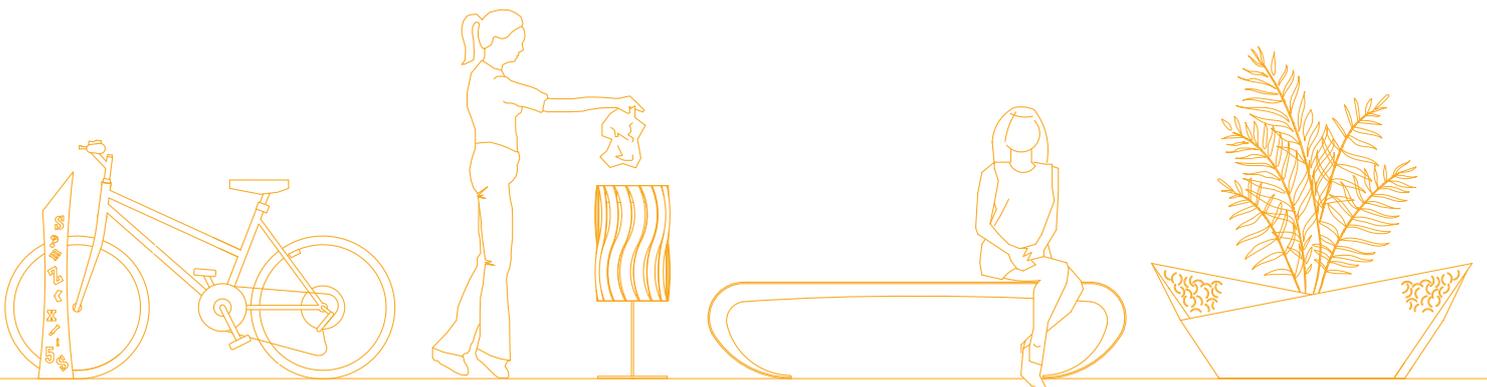

Quasi il 75% dei prodotti in alluminio realizzati in passato è ancora utilizzato oggi; questo perché l'alluminio può essere riutilizzato per lo stesso scopo più e più volte. Tutto ciò contribuisce alla creazione di un bacino di disponibilità del materiale in continuo riassortimento. A differenza di altri materiali, l'alluminio non perde le sue caratteristiche e peculiarità durante il processo di riciclo.

In più, il riciclo richiede solo il 5% dell'energia utilizzata in origine per la produzione, il che permette di risparmiare 9 tonnellate di CO2 emessa. Il riciclo degli scarti dell'alluminio consente di risparmiare attualmente circa 80 milioni di tonnellate di gas emessi ogni anno nell'atmosfera.

Per questo CITYSi, sempre attenta al sostegno dell'ecologia ed unita ad una forte esperienza nella lavorazione delle leghe metalliche, utilizza per i suoi prodotti di arredo urbano l'alluminio, riducendo al minimo, manutenzione, costi e pesi. Inoltre con l'effetto legno su alluminio CITYSi propone una valida alternativa lì dove nei suoi prodotti è presente il legno, permettendo tramite un processo industriale la riproduzione delle venature.  
riciclo.

SMART WORKING AREA

OASI DIGITALE

CITYSI

Il progetto Oasi Digitale consiste in un gazebo smart, autoalimentato con dei pannelli solari, che può accogliere fino a sei persone. Fornisce loro, oltre alla postazione di lavoro, anche l'energia elettrica per alimentare i propri laptop.

È un gazebo da installare nei parchi pubblici comunali al posto dei classici pergolati in legno, o nei luoghi inaccessibili alla corrente elettrica (ad esempio in montagna, luoghi remoti, spiagge).

Il progetto è pensato per soddisfare il crescente trend dei nomadi digitali e dello smart working in generale. Viene proposto a tutte quelle realtà pubbliche o private che decidono di offrire una postazione di lavoro all'aria aperta a coloro che hanno la possibilità di lavorare da remoto (liberi professionisti di ogni genere, Informatici, Nomadi Digitali, Copywriter, Vlogger, Travel Blogger, Bike Blogger, e tutti coloro i quali hanno necessità di un supporto all'ombra e di una rete elettrica per poter svolgere il loro lavoro attraverso un pc, inclusi gli studenti).

Al fine di rendere questo dispositivo un vero e proprio ufficio all'aperto, è possibile dotarlo di connessione Internet attraverso Slot 4G (NO RESTRIZIONI DI ACCESSO) e di modulo di accesso wi-fi dal quale poter gestire la manutenzione e monitorare tramite semplice dashboard il funzionamento della rete e le eventuali anomalie

# DIGITAL OASIS

Smart gazebo

*The Digital Oasis project consists of a smart gazebo, self-powered by solar panels, which can accommodate up to six people. It provides them not only with a workstation but also with electricity to power their laptops.*

*It is a gazebo to be installed in municipal public parks instead of classic wooden pergolas, or in places inaccessible to electricity (such as in mountains, beaches or remote places).*

*The project is designed to meet the growing trend of digital nomads and smart working in general. It is proposed to all those public or private entities that decide to offer an open-air workstation to those who have the possibility of working remotely (freelancers of all kinds, Computer Scientists, Digital Nomads, Copywriters, Vloggers, Travel Bloggers, Bike Bloggers, and all those who need support in the shade and a power grid to be able to do their work through a PC, including students.*

*In order to make this device a real outdoor office, it can be equipped with Internet connection through 4G Slot (NO ACCESS RESTRICTIONS) and wi-fi access module from which you can manage maintenance and monitor any anomalies, including network operation, through a simple dashboard.*

Concepita per vivere lo spazio pubblico rispettando la nostra Filosofia di città positiva, sostenibile, la **Elios Smart bench** è l'eccellenza nata per offrire al fruitore un'esperienza sempre più completa.

Abbiamo unito a una panchina dal design moderno nuove soluzioni tecnologiche, quali alimentazione da energia rinnovabile, ricarica dei dispositivi informatici, illuminazione intelligente e connessione alla rete Internet.

Le nostre panchine sono costantemente monitorate telematicamente e tutte le funzioni sono controllabili tramite il nostro intuitivo portale web, direttamente dal cliente finale.

Elios, nella sua versione standard, non richiede nessun cablaggio elettrico aggiuntivo e l'unico requisito di installazione è una zona all'aperto. Tutte le componenti elettroniche sono racchiuse in involucri stagni e i punti di connessione sono sicuri e resistenti agli agenti atmosferici.

È sicura perché controllata da sensori che la proteggono da corto circuito, e tutta la componentistica è regolata dalle severe normative europee, garantendo al manifatto la marcatura CE.

**Totalmente MADE IN ITALY**, dalle dimensioni contenute e dal design accattivante, la Elios è una panca che si adatta a tutte le esigenze, inglobandosi completamente nel contesto urbano.

# ELIOS

## SMART BENCH

*Conceived to live the public space respecting our philosophy of positive, sustainable city, the Elios Smart bench is the excellence born to offer the user an increasingly complete experience;*

*We have combined a modern design bench with new technological solutions, such as renewable energy, IT device charging, intelligent lighting and connection to the Internet.*

*Our benches are constantly monitored electronically and all functions can be controlled through our intuitive web portal, directly from the end*

*customer. Elios, in its standard version, requires no additional electrical wiring and the only installation requirement is an outdoor area. All the electronic components are enclosed in sealed enclosures and the connection points are safe and resistant to atmospheric agents.*

*It is safe because it is controlled by sensors that protect it from short circuit, and all the components are regulated by the strict European standards, guaranteeing the product the CE marking.*

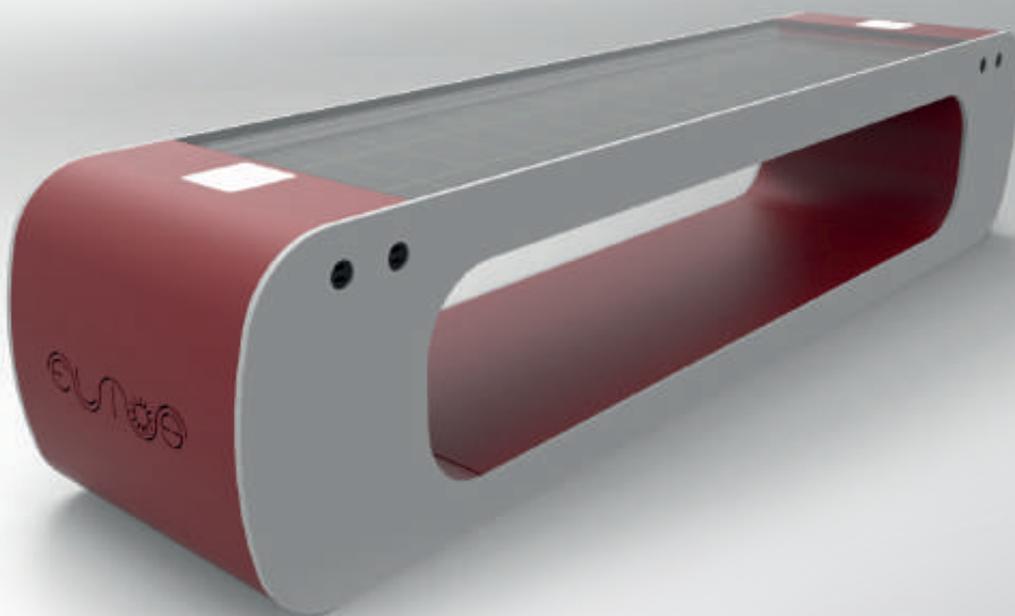

*Totally MADE IN ITALY, with contained dimensions, and with an attractive design, the Elios is a bench that adapts to all needs, being completely incorporated into the urban context*

The background is a vibrant composition of orange and yellow tones. It features several large, overlapping geometric shapes: a large circle in the center, a thick horizontal bar, and various smaller circles and semi-circles. Scattered throughout are white handprints of different sizes and orientations, some solid and some as outlines. The overall style is modern and graphic.
